# Ignacio Cerda

Fullstack Developer | TypeScript | Python | AI (Agent-based & RAG)

## SUMMARY OF QUALIFICATIONS

Experienced fullstack developer with hands-on work building web apps integrated with agent-based AI and Retrieval-Augmented Generation (RAG). I turn AI into business value through scalable, performant, and user-friendly products. Skilled in technical leadership, microservices architectures, and data-driven workflows.

Proven track record as tech lead across FRST, CoreChange and SolEI, delivering AI-focused frontend and backend platforms. I design and implement microservices, data pipelines, and AI integrations to accelerate product delivery and knowledge management.

Analytical, collaborative and hands-on, I mentor teams, conduct code reviews, and adapt quickly to changing priorities. I value clear communication, experimentation, and a customer-centric mindset to drive meaningful outcomes.

### Competencies

- Tech Lead
- AI
- RAG
- Fullstack Developer
- GIS
- React
- Next.js
- SvelteKit
- TypeScript
- Python
- OpenAI
- Leaflet.js

### Industry Experience

- SaaS
- Real Estate
- Startup

### Technology

- Leaflet.js
- Turf.js
- React
- Next.js
- SvelteKit
- Redux Toolkit
- XState
- Node.js
- Python
- OpenAI
- Upstash
- Firebase

### Languages

- Swedish (Fluent)
- English (Fluent)
- Spanish (Native)

# Assignments

## Fullstack Developer | Tech Lead

2025-10 - Ongoing

**FRST, Malmö**

Led AI-driven solutions with agent-based systems for documentation, support and coordination. Designed and implemented microservices and data pipelines for internal products. Integrated RAG: semantic indexing and hybrid retrieval for contextual knowledge management.

AI | Agent-based systems | Microservices | Data pipelines | RAG | Knowledge management | Technical leadership

## Internal Platform Developer

2025 - 2025

**FRST.OS**

Knowledge and project management system powered by LLMs for search, documentation and decision support (RAG + tools).

LLM | RAG | Knowledge management | Search

## Tech Lead

2025 - 2025

**Coompanion**

MVP with AI-based funding guide and SROI module; architecture designed for rapid iteration and scalability.

Tech Lead | AI | MVP | Prototyping | Architecture

frst.

# Assignments

## Tech Lead

2025 - 2025

**Connect Norr**

Platform for business succession processes. AI module automatically generates company summaries, and chat interface with RAG connected to a specialized knowledge base.

AI | RAG | Knowledge base | Chatbot | Leadership

## Frontend Developer (GIS & CRM)

2024 - 2025

**SolEl Grossisten AB, Malmö**

Developed a business web application combining GIS and CRM to visualize solar panel installations. Built interactive maps with Leaflet.js and geospatial calculations with Turf.js. Advanced state management with XState and Redux Toolkit; frontend built with React and Next.js.

GIS | CRM | React | Next.js | Leaflet.js | Turf.js | XState | Redux Toolkit

## Frontend Developer | Tech Lead

2023-12 - 2025-10

**CoreChange, Malmö**

Technical lead in client projects and internal initiatives with strong AI focus. Developed FRST.OS, an internal platform for project and knowledge management using generative AI (RAG + tools). Mentorship and code review to ensure quality and best practices across the team.

Frontend development | AI | RAG | Technical leadership | Mentorship | Code review
